EXPERIENCE

Nov., 2002 – Present.

MARK MOODY PHOTOGRAPHY, Sole Proprietor: Fine-Art and Stock photography emphasizing subject matter which exists at the boundary between reflected light and transmitted light microscopy. My slide-to-digital print process includes: Knowledge and implementation of color profiles for viewing and printing images, high resolution scanning of transparencies, monitor calibration with professional equipment, image color correction, CMYK conversion, preparation of Master Files for digital printing processes and the creation of archival media (DVD and CD). I have extensive knowledge, including troubleshooting, of both PC and Macintosh platforms (10+ years with both types of computers). Well acquainted with the use of Microsoft Office software including: Excel, Word, and PowerPoint on both Macintosh and PC. Proficient in the use of Adobe Photoshop v5.0-CS2, Adobe GoLive v4.0-CS2, and Genuine Fractals PrintPro. I have a proven record of the ability to work alone, and with teams, to complete/solve complex projects and problems. I am represented non-exclusively by Gallery 110, located in Pioneer Square at 110 South Washington Street, Seattle, WA 98104, 206.634.9336. Some current work and more information can be found at: <http://www.markmoodyphotography.com>, and <http://www.gallery110.com>.

May 2006 – Present.

CUSTOMER SUPPORT REPRESENTATIVE: GalleryPlayer, 83 S. King St., Ste 300, Seattle, WA, 98104, 206.622.4500.

Customer support for the international customer base of GalleryPlayer, a company dedicated to providing affordable and high quality digital artwork for HDTV LCD and Plasma displays. I provide customer support to the entire spectrum of computer users regarding the use of GalleryPlayer software and High Definition imagery. My additional responsibilities include: royalty reporting for GalleryPlayer's artists and image providers over multiple digital platforms, sales reporting and data analysis, computer troubleshooting, maintenance, and repair, mailing list maintenance and promotional emails.

June 2003 – May 2006.

RESEARCH SCIENTIST 1: Division of Pulmonary and Critical Care Medicine, University of Washington School of Medicine, Seattle, Washington 98195. Supervisor: Dr. Teal Hallstrand, Assistant Professor of Medicine, 206.221.6506.

Responsible for analysis of clinical samples in on-going clinical research examining the physiological basis of exercise-induced asthma. Development, optimization, and utilization of laboratory protocols designed to investigate airway inflammation and associated airway remodeling including: isolation RNA for genetic analysis, magnetic cell-separation, high-throughput fluorescent analysis of exhaled breath condensate, ELISA of lipid mediators and mucins, development of *in vitro* models including isolation of primary cultures, and identification/characterization of inflammatory cell population distribution. Additional responsibilities include the maintenance of laboratory equipment and operation.

September, 1999 – Dec. 2002

STAFF SCIENTIST: Inologic, Incorporated. 3005 1st Ave, Ste. 300, Seattle, WA. Supervisor: Dr. Alexis Traynor-Kaplan, CEO and co-founder, 206.448.9226.

I excel at optimizing experimental results.

Responsible for developing primary cell lines and well differentiated *in vitro* models for use in electrophysiological experiments. Developed protocols to examine the effects of phosphoinositide analogs on ion channel regulation. Responsibilities include: Summarizing acquired data for grant renewal deadlines and patents, grant writing, review of current and related literature, preparing abstracts for presentation, primary cell isolation and culture, Ussing chamber operation, lab maintenance, supply ordering, and training of laboratory personnel.

October, 1994 - June 4, 1998.

RESEARCH TECHNOLOGIST II: University of Washington School of Medicine, Division of Gastroenterology and Seattle Veterans Affairs Medical Center. Supervisor: Dr. Toan Nguyen, Associate Professor of Medicine, 206.762.1010 x1485.

Lead technician for the Cystic Fibrosis electrophysiology core for the gastroenterology department at the University of Washington School of Medicine. Experience with complex laboratory research in

cell physiology including: fluorescence and time-lapse microscopy, diffusion chamber operation, isotope efflux assays and auto-titrator operation. Experienced with advanced cell culture techniques for more than 20 epithelial and mesenchymal cell lines, including isolation of human cell lines and co-culture. Familiar with the following Molecular Biology techniques: DNA/RNA isolation, DNA ligation/digestion, agarose gel electrophoresis, SDS-PAGE, and transfection. Handling of the following radioisotopes according to N.R.C. safety regulations: ^{32}P , ^{125}I , ^{86}Rb , ^{35}S . Maintenance of radioiodination facility. Manager of laboratory supplies and equipment. Manager of all laboratory databases. Responsible for review of current and related literature. Experience at supervising and training laboratory personnel. Proficient in use of Macintosh and Windows 9x operating systems utilizing the following software: Microsoft Word, Excel, Powerpoint, Microcal Origin 6.0, Filemaker Pro, Cricket Graph, Endnote, and Adobe Photoshop, Metamorph/Metafluor.

May, 1994 - Sept., 1994.

RESEARCH TECHNICIAN: Seattle Institute for Biomedical and Clinical Research at the Seattle Veterans Affairs Medical Center, 1660 S. Columbian Way, Seattle, WA. Supervisor: Dr. Toan Nguyen, Associate Professor of Medicine, 206.762.1010 x1485.

University of Washington affiliated laboratory. Responsible for cell culture and executing physiological experiments on various cell models including: CFPAC-I, DPDE, MGBE, IB3, and T84 cells. Maintenance of laboratory equipment and supplies. Familiarity with protein assays and receptor binding assays using radiolabeled peptides. Data compilation and analysis.

Nov., 1991-Sept 1993.

RESEARCH ASSISTANT: Institute for Watershed Studies, Western Washington University, Bellingham, WA. Supervisor: Thomas A. Storch, Ph.D. Washington State Department of Ecology certified laboratory. Proficient with chemical, physical, and biological analyses on lakes and streams. Responsible for preparation of an environmental health report for the Washington State Department of Ecology based on the collection and identification of aquatic macroinvertebrates. Experience with the preparation, organization, and construction of research equipment. Responsible for data entry, analysis, and data quality control. Laboratory maintenance and glassware preparation.

Summer 1991

VOLUNTEER: Institute for Watershed Studies, Western Washington University, Bellingham, WA. Assistant to Institute personnel in sampling, analyses, lab maintenance, data entry, and data quality control.

EDUCATION

Bachelor of Science, Environmental Science,
Huxley College of Environmental Studies,
Western Washington University, Bellingham, Washington
Major: Watershed Studies/Aquatic Entomology
March, 1993.

HONORS

- Oral presentation at Workshop Session II, Workshop 11: Therapeutic Approaches to Modulate or Bypass CFTR, Friday, October 26th, 2001 at the Fifteenth Annual North American CF Conference, Orlando, FL, October, 2001.
- Nomination and member: R&D Research Safety Subcommittee, Nov., 1996
- Chuckanut District of Garden Clubs Scholarship, 1992-93.
